

Bytové jádro B 10

Obvodová konstrukce je vytvořena z příček lehké prefabrikace. Jádro B 10 je prostorové, sestává ze sektoru záchodu a ze sektoru koupelny a je řešeno pouze pro ústřední přípravu TUV.

Dispozičně je jádro řešeno ve variantách:

- s návazností kuchyňské sestavy,
- bez návaznosti kuchyňské sestavy
- kuchyňský blok
- přídatné zařízení.

Větrací systém je centrální s větrací jednotkou umístěnou na střeše.

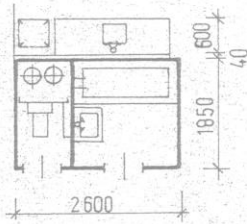

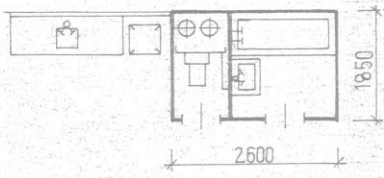

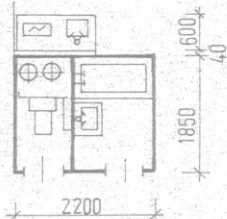

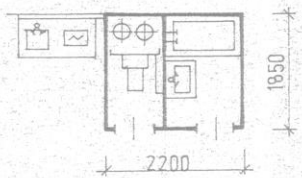

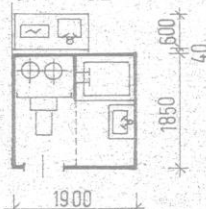

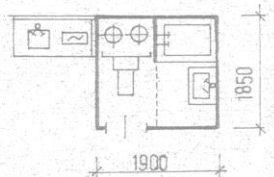

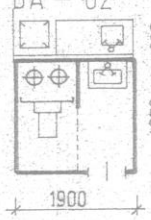

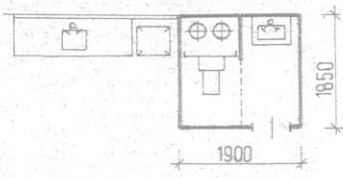

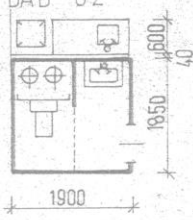

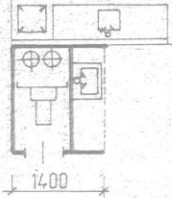

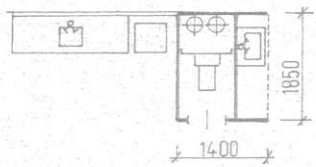

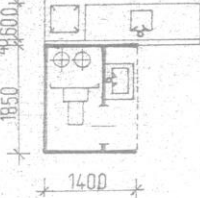

Rozvody studené vody jsou z trubek rPe. Od konce roku 1985 jsou vyráběna tato jádra s mezikusem pro vodoměr TUV.

Pravé sestavy a levé sestavy jsou zrcadlové.

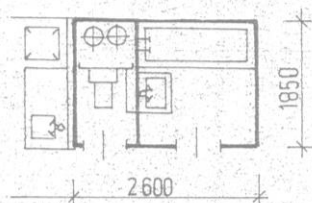

Varianty 01 – s ústřední přípravou TUV, vaření plynem

Varianty 02 – s ústřední přípravou TUV, vaření elektřinou

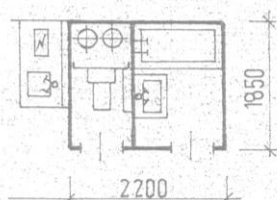

Varianty 00 – s ústřední přípravou TUV, bez vaření
